

Integrated Management System

Unify quality and compliance
management across your
organization

Integrated Management System

Get a single, cloud-based system to manage compliance and quality processes – transforming your risk, performance and sustainability initiatives.

CHALLENGE

Too many quality and compliance recording systems

Initiatives for quality, efficiency, safety and sustainability combined with changing industry regulations complicate compliance monitoring; producing a mass disjointed recording and reporting systems.

Such a fragmented approach is wasteful and can't provide the kind of rapid, accurate reporting that stakeholders need.

SOLUTION

Manage all your quality and compliance initiatives in one place

Highly regulated manufacturers need to unify quality and compliance management—in a way that's quick to implement, completely configurable and scalable across the organization.

With the Integrated Management Systems solution powered by MATS, you can retire paper-based records and use mobile devices to record everything from quality audits to required maintenance tasks and performance metrics. Better still, it integrates with your core systems so you can correlate quality and performance data with production, HR and other key data sources.

A cluster of colorful geometric shapes including diamonds, circles, and triangles in shades of blue, yellow, red, and orange, located in the top-left corner of the slide.

Why Manage Quality and Compliance with MATS?

When you manage quality and compliance initiatives with the Integrated Management System powered by MATS, you benefit from:

- **Fast implementation** with a cloud-based quality management solution
 - **Less time wasted** on manual audit and recording tasks
 - **Real-time visibility** of key performance, quality and compliance metrics
 - **Faster turnaround times** for maintenance and corrective actions
 - **The ability to configure** the solution as business and compliance requirements evolve
- 
- A collection of colorful geometric shapes including circles, diamonds, and triangles in shades of blue, yellow, red, and orange, scattered in the bottom-right area of the slide.

Key Features

Cloud, web and mobile ready

- Implement with minimal disruption to internal IT
 - Save employee time with mobile device data entry
 - Support any device – tablet, smartphone or desktop
 - Deploy in the cloud or on-premise
-

Data integration

- Integrate data from ERP and other data sources
 - Produce powerful reports that combine production, costs, maintenance and quality data
-

Master data

- Quickly set-up and import master data
 - Integrate data from products and configurations, production lines, compliance hierarchies, risk registers, audit types, performance targets and alerting thresholds
-

Flexible workflow and case management

- Configure specific workflows for different audits, corrective actions and maintenance alerts
-

Service levels, thresholds and alerts

- Assign service levels, thresholds and alerts so that corrective actions are appropriately escalated
 - Push alerts (web, email, SMS) to maintenance or other staff to accelerate resolutions
-

Reporting and audit trail

- Flexible reporting
 - A single source of truth for production, quality, compliance and maintenance data.
 - Full audit trail reporting
-

M2M ready

- Supports machine-to-machine communications from SIM enabled devices
 - Trigger workflow alerts with real-time telemetry
-

Support for continuous improvement

- Enable all staff to submit improvement ideas and facilitate bottom-up process improvement
 - Easy and flexible configuration options help you quickly adapt as business requirements and regulations change
-

Smart Process Apps

Powered by MATS

MATS Smart Process Apps are developed on the MATS Low-code Development Platform. That means they are highly configurable and can easily be integrated into your wider IT landscape.

You can implement a Smart Process App almost out of the box, or adapt it to your custom business requirements, at a fraction of the cost and time of traditional software development.

Deployed via the Cloud (and also available on premise), Smart Process Apps are web and mobile ready.

About MatsSoft

MatsSoft is on a mission to close the Process Execution Gap – the gap between the people who know what they want to improve, and the coders who make it happen.

We started life as a digital design agency, which taught us a thing or two about customer-centric design. We set out to create a new kind of process improvement platform – one that eliminates coding and complexity, making it easy for process people to make the changes they want to make.

Today, our Low-code Development platform, MATS, is used by process improvers, customer champions, innovation leaders and IT teams in organizations across the globe. Customers include Nationwide Building Society, Coca-cola, FedEx, Thomas Cook, Barclaycard, RBS, Santander and Intel.
