

**MATS**<sup>®</sup>  
Easier done than said

# Get faster results with MATS Low-code

In the time it takes you to explain to a team of consultants how you'd like to fix your broken process, you could design it, deploy it and watch it work.

## BUILD

Collaboratively configure your app faster than you could brief a programmer to develop it for you

## DEPLOY

Deploy your app with flexible, affordable licensing and cloud hosting that scales as you need it

## IMPROVE

Track how your app gets used in real-time and make improvements easily based on that insight

“The solution has given us greater capacity to service more leads and keep customers smiling.”

# The MATS Low-code Advantage

- Fast, low-risk 'test & learn' environment
- Rapid assembly and configuration
- Secure Cloud or on-premise delivery
- Enterprise scalability
- Workflow / Case Management
- Rules engine and automation
- Service level monitoring
- Responsive design - mobile device ready
- Mobile apps for iOS and Android
- Easy and practical integration with legacy systems
- Real-time reporting and analytics
- Ideal for M2M / Internet of Things solutions
- SaaS - consumption based pricing
- Rapid ROI
- A range of pre-configured solutions to accelerate deployment

## Test & learn

MATS is a new breed of "Low-code" BPM software that's quick to learn, easy to use, and requires less IT.

By using its drag-and-drop interface to configure, rather than code, you can build a new app faster than you can brief IT to do it for you.

So you can have an idea, build an app for it, test it with users, refine it and make it live - all in the space of just a few days.
